

## AMENDMENTS TO THE CLAIMS

### **Claims 1-27 (Canceled)**

**Claim 28 (New)**      A computer comprising a casing having a display which is bordered by a frame, wherein said frame has a passage arranged therein with a cooling fluid in said passage, and wherein said frame itself forms said passage for said cooling fluid.

**Claim 29 (New)**      The computer of claim 28, wherein said passage extends around said frame.

**Claim 30 (New)**      The computer of claim 28, wherein said frame is of a single-wall configuration.

**Claim 31 (New)**      The computer of claim 28, wherein said frame is made from an extrusion.

**Claim 32 (New)**      The computer of claim 31, wherein the entire said casing is made from an extrusion.

**Claim 33 (New)**      The computer of claim 28, wherein said casing comprises outwardly projecting cooling ribs.

**Claim 34 (New)**      The computer of claim 28, wherein cooling ribs are arranged on said casing that project into the interior of said casing.

**Claim 35 (New)**      The computer of claim 28, wherein cooling ribs are arranged on at least part of the inside of said passage.

**Claim 36 (New)**      The computer of claim 28, wherein connecting portions which project into the interior of said casing are provided on said passage in fluid communication with said passage.

**Claim 37 (New)**      The computer of claim 36, wherein said connecting portions are exactly two connecting portions.

**Claim 38 (New)**      The computer of claim 37, wherein a respective one of said two connecting portions is arranged at each of a top side and an underside of said frame.

**Claim 39 (New)**      The computer of claim 28, and further comprising a fluid-conducting communication between said passage and at least one heat exchanger on the interior of said casing.

**Claim 40 (New)**      The computer of claim 39, wherein said fluid-conducting communication comprises a hose connection.

**Claim 41 (New)**      The computer of claim 39, wherein said computer comprises a CPU having one of said at least one heat exchanger arranged thereat.

**Claim 42 (New)**      The computer of claim 28, and further comprising at least one pump arranged to circulate the cooling fluid in said passage.

**Claim 43 (New)**      The computer of claim 28, wherein the cooling fluid is a liquid.

**Claim 44 (New)**      The computer of claim 28, wherein the cooling fluid is water.

**Claim 45 (New)**      The computer of claim 44, wherein the cooling fluid is distilled water.

**Claim 46 (New)**      The computer of claim 28, wherein said display is a touch display.

**Claim 47 (New)**      A method of cooling electronic components in the computer according to claim 28, comprising:

circulating said cooling fluid in said passage of said frame; and  
passing said cooling fluid from said passage through a fluid-conducting communication into the interior of said casing so as to cool at least one electronic component in said casing.

**Claim 48 (New)** The method of claim 47, wherein the at least one electronic component that is cooled by said passing is a CPU.

**Claim 49 (New)** A casing for electronic components including a frame, wherein said frame has a passage arranged therein with a cooling fluid in said passage, and wherein said frame itself forms said passage for said cooling fluid.

**Claim 50 (New)** The casing of claim 49, wherein said casing is a computer casing.

**Claim 51 (New)** A computer comprising:  
a display;  
a casing having a frame which surrounds said display; and  
a passage in said frame and a cooling fluid in said passage;  
wherein said frame itself forms said passage for said cooling fluid such that said passage at least partly extends around the outer periphery of said display.

**Claim 52 (New)** The computer of claim 51, wherein a CPU of said computer is provided inside said casing.
